All of our vinyl is made in the U.S.A. The raw materials for virgin vinyl are natural gas, saltwater and air. Virgin vinyl fencing engineered with StayStraight rails to ensure long-term structural integrity without sagging or bowing. SolarGuard protection provides industry-leading resistance against fading and discoloration, maintaining vibrant color even in the harshest coastal climates.

**Lifetime Warranty:** We use only the highest-grade materials in our vinyl fencing products. The lifetime warranty guarantees that your vinyl fencing will be free from material and workmanship defects—including peeling, flaking, rotting, chipping, cracking, blistering, discoloration, and fading—for as long as you own your home (one time transferable).

VINYL STYLES AND COLORS

**Strong Gate Systems:** Designed in a way so that gates stay strong, balanced and secure for the lifetime of the gate. We engineered 90 degree gate corners keeping our vinyl gates strong and square in every corner.

**Self Closing Gate Hinges and Gate Latches:** Marine grade stainless steel and then powder coated which provides the ultimate resistance to extreme weather. Our gate hinges passed the test when subjected to 75 lbs. of force on a 58" x 6' gate then cycled 25,000 cycles.

**Perfectly Balanced Rails:** The rails of your fence will never warp, bow or sag over the lifetime of your fence. \* Do not use fence to retain soil.

**Tongue and Groove Boards:** Tongue and Groove boards lock together adding strength to your fence and privacy to your yard. Rails are engineered in the vinyl at specific spots to enhance strength and quality. Our vinyl fence is engineered to withstand 130 MPH gusts of wind.

**Sun Protection** The base ingredient in our vinyl fence is Rigid Polyvinyl Chloride. "Virgin Vinyl" modified to provide superior impact strength and ultraviolet resistance. Custom engineered to accommodate temperature changes and maintain durability. Every fence we make has titanium color retention technology which helps protect it from the rays of the sun.

Closing Wrap Hinges

Made from a tough light weight low density polyethylene (LLDPE) and reinforced internally with galvanized steel, the fences are impact-resistant and designed to withstand extreme weather, including temperatures from -40°F to 140°F. Molded from real stone or wood textures, providing a highly realistic appearance on both sides. Never warps or fades and never needs painting. It is also graffiti-resistant and a sound barrier. The solid, dense panel provides an excellent sound barrier, blocking up to 98% of direct sound. Made in the U.S.A. Lifetime Warranty.

Japanese Cedar (Sugi) is grown and milled in Japan before arriving at BeachYard. Naturally engineered to thrive in harsh, salt-heavy coastal environments, thanks to a unique cellular structure that acts as built-in insulation. This provides exceptional dimensional stability, preventing the wood from warping or twisting. Historically prized in Japanese shipbuilding for being waterproof, making it an elite choice for oceanfront construction. Sugi contains natural oils and tannins that preserve the wood, repels moisture and deters termites, and carpenter ants.
